

# Agile and Continuous delivery at Microsoft

Vitek Karas  
Senior Software Engineer  
.NET Team  
Microsoft

# The punchline

There is no single way Agile is done at Microsoft

This is the Developer Division's story

- 3 week sprints
- Scrum at the team level
- Emphasis on self-managed teams
- Top-down and bottom-up
- Expanding to DevOps

# OLD: Schedule

2 years

# OLD: Schedule

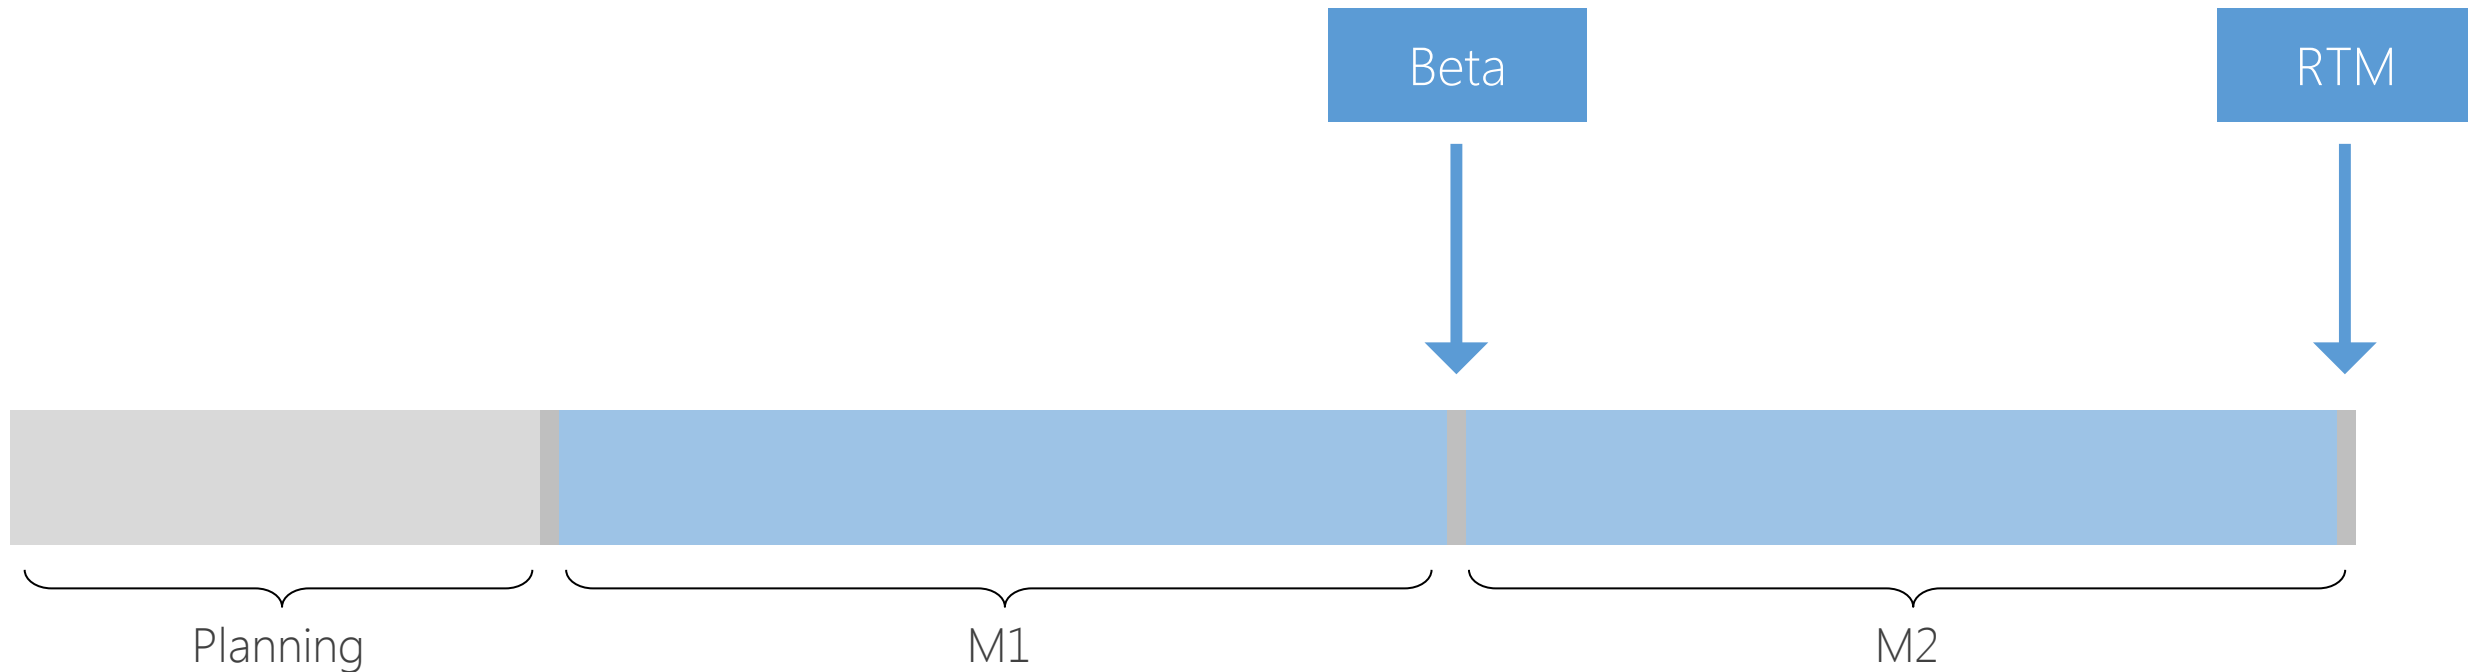

# OLD: Planning

We knew **exactly** what to build,  
and we **knew** it was right!

# OLD: Milestones

We had a **perfect schedule** and knew exactly when it would be ready!

# OLD: Writing code

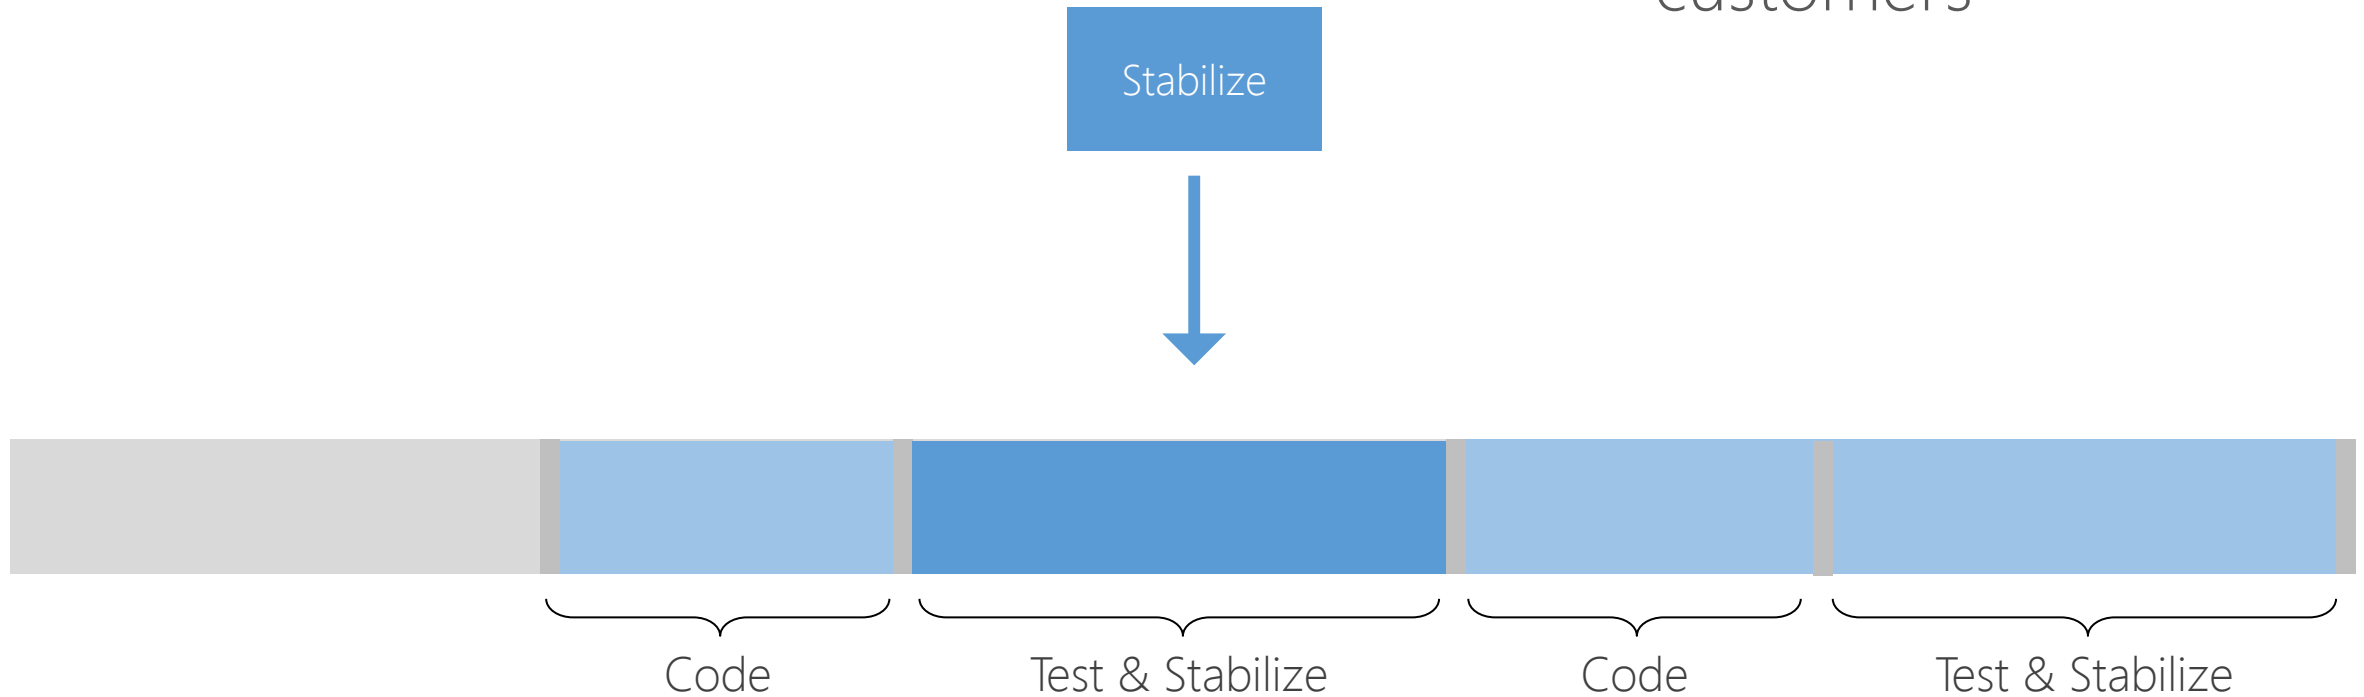

Code  
Complete

We wrote **all the code** months before  
we shipped a release.

# OLD: Fixing bugs

We now **just needed to stabilize** the code and get it ready to ship to customers

Q: How did it work?

A: Very well in the era in which it was born. But...

Times have changed.

# Our roles

**Program Manager** – Responsible to ensure we're building the right thing.

**Engineer** – Responsible to ensure we're building products that are fast, reliable, and well engineered.

# Organization chart

Program Management

Engineering

# Our teams

Program Management

Engineering

# Teams

- Cross discipline
- 10-12 people
- Self managing
- Autonomous backlog
- Intact for 12-18 months
- Physical team rooms

Sprint

3-week sprints

3

Season

6 month season

Sprint 70

# Q: What do you track?

Question?

# Q: What do you track?

Question?

## Things we watch

- # of bugs
- Test coverage
- Rolling build quality
- Dev cycle time
- Live site/Customer issues

## Things we don't watch

- Team burndown
- Team velocity
- Original estimate
- Completed hours
- Team capacity
- # of bugs found

Sprint

3-week sprints

Season

6 month season

6

Vision

18 month vision

18

# Season

- Spring -> Fall -> Spring -> ...
- Team Chats with the boss
  1. What's next on your backlog?
  2. What's your debt?
  3. Any issues?
- Reviews – high level plan for the next season

Sprint

3-week sprints

3

Season

6 month season

6

Vision

18 month vision

18

# Vision

What did we learn over the last 6 months?

What did customers tell us?

What did the telemetry tell us?

What changed in the marketplace?

# Take-a-ways

1. Less is more
2. Get out of your teams' way
3. Autonomy, mastery, purpose
4. Feedback loop
5. Have fun
