

## Combining agile & mobile development in a multinational corporation

Miloš Broulík

15 September 2014

# Agenda

- About me
- The application
- Our project
- How do we do it

# About me

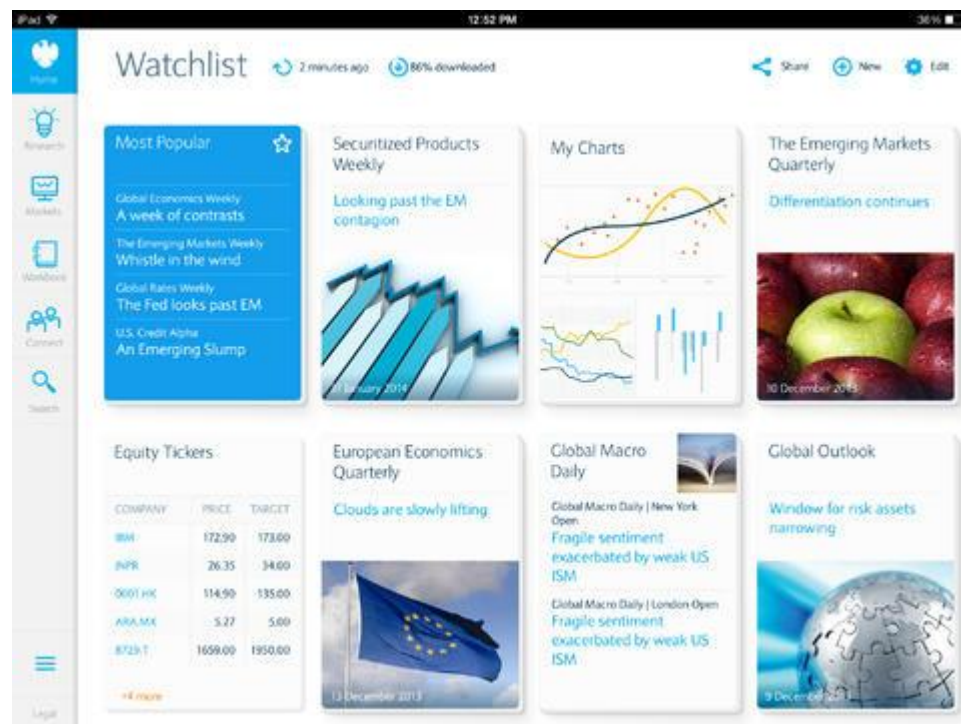

- Developer (Java/Android/JavaScript)
- Barclays 2 years
- Unicorn College graduate
  - Unicorn = software factory
  - Rational Unified Process
- Startup
  - Mobile/Banking

# The app – Barclays live mobile

- Barclays live web portal clone
  - Publications
  - Market data
- **Android port** from iPad
- Native/HTML = 50/50
- 5 devs + lead
  - 2 India
  - 2 Prague
  - 1 + 1 Dallas
- Business in New York
- Test team in India

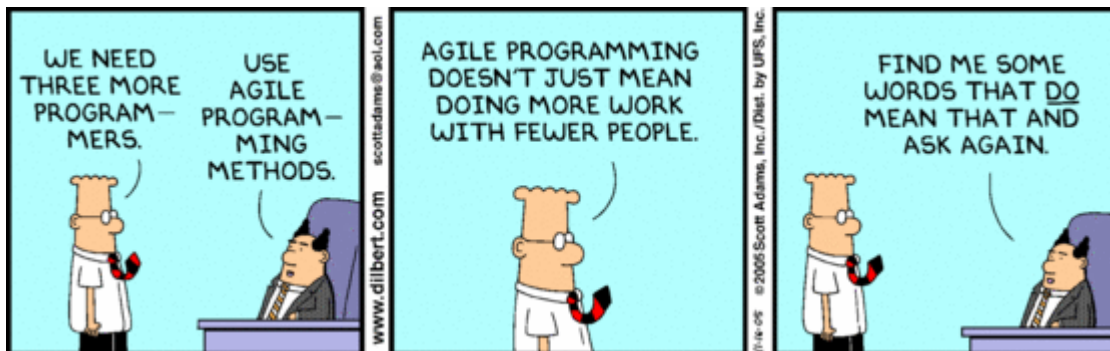

# The ideal project

- Initial release
- Fixed scope
- Internal customer
- **Business buy in**
- External systems working
- Simple build & delivery
- Already working
- Technically simple
- Mobile project

- Jira tickets
  - Daily scrum (without owner)
    - 5 – 30 minutes
  - Release 2 times a week
    - Continuous delivery
  - 2 week sprints → canban style
  - Just two milestones
    - Closed pilot
    - Release
  - Code reviews
- No retrospective
  - No big architecture discussions
  - No full list of issues
  - No hand holding

Thank you
